

Dear FCC

I understand that you are considering allowing LPFM stations to take priority over current FM transaltor Service. This would be a great injustice. This would impact many of the listener supported stations that have good family/children friendly programming on the air.

One in particular ifs K-LOVE. This station serves my community as well as 196 other cities within the US. This is a station that broadcasts good music/information etc that all ears can hear.

Losng this station would have a huge affect on many people anfd thus I am asking that you continue the current FM Bands to rule that air way. Please do not allow MB Docket No. 04-233 to go through.

Thank you

Steven Werner
